

## EVALUATION LETTER

---

Project Name: "Can't You SEA?"

Project Activity: Erasmus+ Youth Exchange

Location: Pissouri, Cyprus

Dates: 12 – 21 November 2025

We would like to express our sincere appreciation for the opportunity to participate in the Erasmus+ Youth Exchange project "Can't You SEA?" (project no. 2024-3-CY01-KA152-YOU000288459), which took place in Pissouri, Cyprus, from 12th to 21st November 2025.

For us at the Association for Education and Development of Young People EduArt Skopje, this project was a valuable continuation of our work in the field of youth development, environmental awareness, and non-formal education. The topic of environmental protection, sustainability, and marine pollution strongly aligns with our organisational focus on empowering young people through education, creativity, and active participation.

Our participants were highly motivated and actively engaged throughout all phases of the project. Even during the preparation stage, they contributed with research, ideas, and reflections, which enriched their involvement during the mobility. Throughout the exchange, they demonstrated a strong sense of responsibility, openness, and willingness to collaborate, fully embracing the intercultural learning environment.

The experience in Pissouri provided an ideal setting for the project. Being surrounded by nature and close to the sea allowed participants to directly connect with the topic, making the learning process more meaningful and impactful. The activities, especially those taking place outdoors and in direct contact with the environment, created strong impressions and encouraged deeper reflection.

The cooperation with partner organisations and participants from different countries was particularly enriching. It created a space for sharing perspectives, building mutual understanding, and developing new ideas together. This intercultural exchange significantly contributed to the personal and professional growth of all involved.

We would also like to highlight the excellent coordination and support provided by the hosting organisation. The entire process was well-structured, communication was clear, and participants felt supported and safe throughout the activity.

The project had a strong impact on our participants, who not only increased their knowledge on environmental issues but also developed important competences such as communication, teamwork, critical thinking, and active citizenship. In addition, they built meaningful connections and friendships that continue beyond the project.

We are grateful for the opportunity to be part of this initiative and for the strong cooperation between all partners. We look forward to future collaborations and projects that continue to promote sustainability, youth empowerment, and international cooperation.

Skopje, North Macedonia

20.04.2026

Elena Tasheva Trpenovski

President of EduArt Skopje
